**BUILDING TEAMS TO
ACHIEVE GOALS****Duration: 2-3 days****Workshop Purpose**

The most important aspect to building a team is being able to lead a team effectively, with the first priority being to establish a relationship with each team member. The most effective team leaders build their relationships on trust and loyalty, rather than fear or the power of their positions. This module focuses on how to build a cohesive team effectively in order to maximise resources and productivity levels.

Competency Outputs

1. Demonstrate knowledge of and insight into the theory of teams and the importance of teams in workplace activities.
2. Apply the theory of teams to team dynamics.
3. Analyse the role of team leader in promoting team effectiveness.
4. Evaluate the effectiveness of a team and propose ways to improve team effectiveness.
5. Liaise and network with internal and external stakeholders.
6. Devise and apply a strategy to establish constructive relationships with team members in a unit.
7. Identify and minimise personal conflict in the workplace.

Methodology

- Individual and Group Exercises and Discussions
- Application project to ensure transfer from workshop to workplace
